

# KoPa WiFi Lab

## APP introduction

Compatibility: iOS , Android , HarmonyOS (v4.0 and below)\*

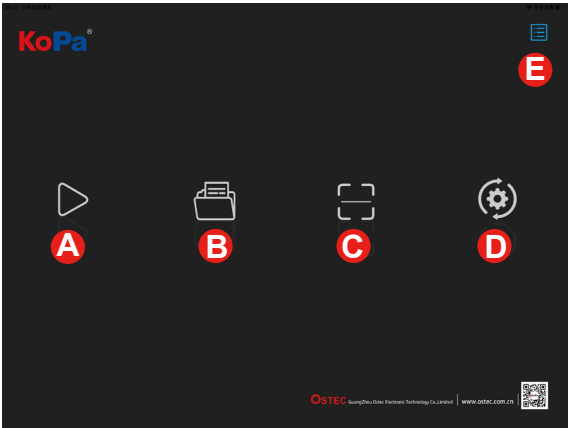

\*Not compatible with HarmonyOS NEXT

Quick Connect:

Simply scan the QR code to access microscope imaging - no password required (works on smartphones/tablets).

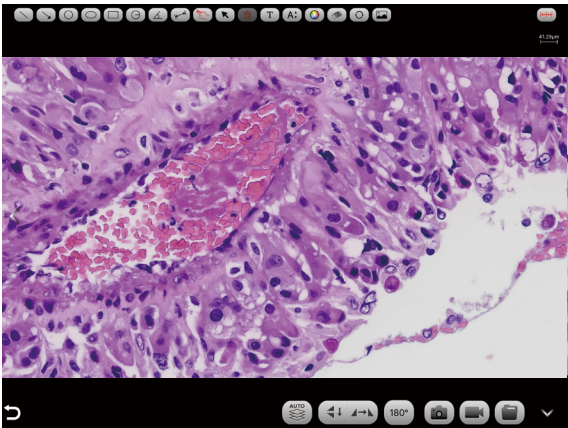

## Key Features

- A** Live image preview
- B** Photo/video management
- C** QR auto-connect
- D** Customizable settings
- E** On-screen user guide

## Powerful Yet Intuitive

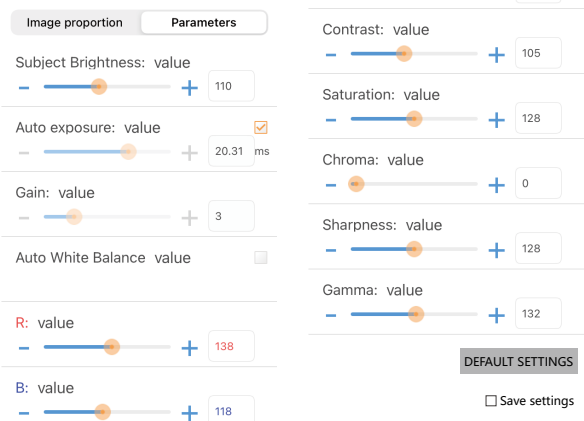

- Real-time image adjustment
- Smart measurement & annotation tools
- Instant depth stacking
- Efficient file management

## Image Adjustment Features

Auto Memory Function:  
Retains all settings after  
restart (brightness, exposure,  
gain, WB, RB, contrast, hue,  
saturation, sharpness,  
gamma, etc.)

- Quick Actions:
- One-click full reset (Default)
  - Custom parameter presets

## Measurement & Annotation Tools

### Precision Measurement

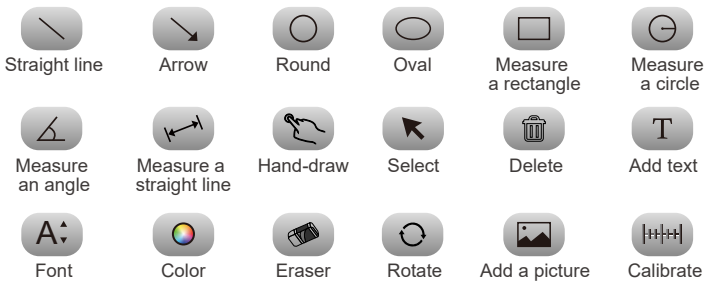

Circle, rectangle, angle, and line measurements  
Calibration data saved after shutdown

### Live Annotation

Draw and edit directly on real-time images  
Text/marker tools for clear documentation

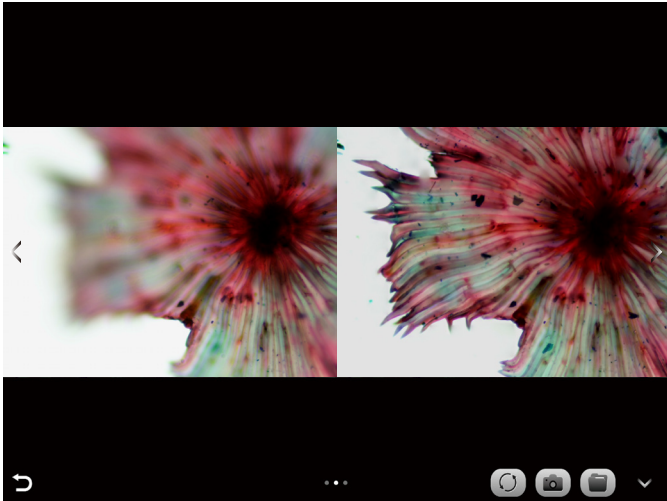

### Comments

Annotate and edit real-time images.

## Depth Stacking Technology

Extended Focus Range: Achieve clearer images beyond single-frame limitations  
Real-Time Processing: Seamless focus stacking during observation  
Precision Optimization: Enhanced detail preservation at all focal planes

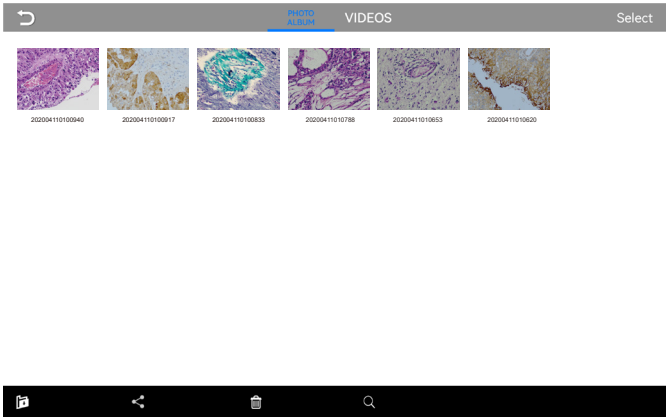

## File Management

Browse & Organize: Instantly access all images/videos;

Flexible Editing: Rename files, search by filename;

Share & Export: Save to device album or share directly to social media;

Quick Cleanup: One-tap deletion.
